Einladung zur Diskussion!

Landinger Sommer, 16.7.2015, Doris Österreicher

An aerial night-time rendering of a futuristic stadium. The stadium's roof is a complex, multi-layered structure with a grid-like pattern and various lighting elements. The central field is illuminated with a bright green glow, and numerous white, pod-like structures are arranged in a circular pattern around it. The surrounding city is visible in the background, with buildings and streets lit up at night.
